

DEVELOPMENT PATHWAYS

7 ways technology can help the COVID-19 social protection response

1. Simplify information and other business requirements

2. Build on existing integrated management information systems and payment platforms

3. Re-use administrative registries and self-registration mechanisms to reach out to additional beneficiaries

4. Rapidly build specific technology components for the COVID-19 response

5. Re-use existing data hosting platforms

6. Strengthen digital literacy and provide feedback systems

7. Coordinate with existing governance systems
